

Call for Papers – Special Session on:

Biology is technology

Organized by Dr. Sounira Mehri Bedoui*

* Department of Biochemistry: Human Nutrition and Metabolic Disorders: "Functional Foods and Vascular Health" LR12ES05, Faculty of Medicine of Monastir , Monastir , Tunisia.

Email : mehrisounira @yahoo.fr

Workshop/Session Aim:

The aim of the session is to provide an overview and a perspective on the breadth and types of technologies that may have an impact on the life sciences of the future.

Many of the technologies discussed in this session create novel opportunities for scientists to explore aspects of biological and chemical diversity :

- * Microscopy
- *Nuclear magnetic resonance
- *Laser technology
- *Gas-phase chromatography,
- *High-performance liquid chromatography
- *Mass spectrometry
- *Polymerase chain reaction ...
- * DNA sequencing techniques
- *Simulations and computations

Workshop/Scientific Committee:

- 1-Raja Chaaba , Faculty of Medicine of Monastir ,University of Monastir, Tunisia
- 2-Nadia koubaa, Faculty of Medicine of Monastir, University of Monastir, Tunisia
- 3-Beligh Mechri, Faculty of Medicine of Monastir ,University of Monastir, Tunisia
- 4-Amira Zarrouk, Faculty of Medicine of Monastir ,University of Monastir, Tunisia
